SEDIMENTARY GEOLOGY

Contents Volume 97, 1995

ExpresSed

Recurrent neomorphic and cement microtextures from different diagenetic environments, Quaternary to Late Neogene carbonates, Great Bahama Bank
R.G. Maliva 1

Carbonate platform stratal geometries and the question of subaerial exposure
B.W. Fouke, E.W. Zwart, A.-J.W. Everts and W. Schlager 9

Silicification of carbonate clasts in a marine environment (Upper Miocene, Vera Basin, SE Spain)
A.J. Martín Penela and G. Barragán 21

Spatial variations in heavy minerals and patterns of sediment sorting along the Nile Delta, Egypt
O.E. Frihy, M.F. Lotfy and P.D. Komar 33

Protolith analysis of metamorphic siliciclastic rocks in the Erzgebirge Mts., Germany
W. Lorenz 43

Siliciclastic sedimentation on a storm- and tide-influenced shelf and shoreline: the Early Devonian Roxburgh Formation, NE Lachlan Fold Belt, southeastern Australia
G.P. Colquhoun. 69

Architectural elements from Lower Proterozoic braid-delta and high-energy tidal flat deposits in the Magaliesberg Formation, Transvaal Supergroup, South Africa
P.G. Eriksson, B.F.F. Reczko, A.J. Boshoff, U.M. Schreiber, M. Van der Neut and C.P. Snyman. 99

ExpresSed

Mid-Paleocene dropstones in the Whangai Formation, New Zealand—evidence of mid-Paleocene cold climate?
D.A. Leckie, H. Morgans, G.J. Wilson and A.R. Edwards 119

High-frequency sequences deposited during Quaternary sea-level cycles on a deforming continental shelf, north Canterbury, New Zealand
P.M. Barnes 131

Guild structure and aggradation pattern of Messinian *Porites* patch reefs: ecological succession and external environmental control (San Miguel de Salinas Basin, SE Spain)
C. Reinhold 157

The enigmatic Messinian–Pliocene section of Cuevas del Almanzora (Vera Basin, SE Spain) revisited—erosional features and strontium isotope ages
A.R. Fortuin, J.M.D. Kelling and Th.B. Roep 177

Origin and depositional model of Wadi Al-Batin and its associated alluvial fan, Saudi Arabia and Kuwait
J.S. Al-Sulaimi and A.F. Pitty 203

Contents Volume 97 231
